Art Unit: 2817

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Ueno et al. The language of the like rejection of the first Office action is hereby incorporated herein by reference. In regard to the arguments and amendment made, FET Q3 of Ueno et al. (Fig. 1 or 7) has its drain connected to the gate of amplifying FET Q1 via resistors R2,R5 so as to compensate the gain of FET Q1 during one mode. Correction FET Q2 is connected to both Q1 and Q3 and operates based on the state of Q3 so as to correct the gain of Q1. See col. 7, lines 10-50 of Ueno et al. Thus the operation of Q2 is based on Q3; it is further based on Q1 since the control signal to Q3 is ultimately derived from the output of Q1 (see fig. 7; the signal applied to terminal B, the gate of Q3 in fig. 1, is derived from the signal Pout at the drain of Q1 in fig. 1).

Art Unit:

Claims 3-23 are allowed; reasons are already of record for the subject matter of claims 3-22. Regarding claim 23, the prior art of record does not show the second variable gain amplifier in the gain deviation correction circuit in the context claimed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Mr. Mottola at telephone number 308-4914.
